To whom it may concern

I am a resident of Sawmill Creek and have patiently waited each year for the past 10 years to obtain a hookup to the sewer line. Each year I am given another song and dance why the project is postponed for another year. Last Year everyone seemed 100 percent positive that the bike path, road upgrade and sewer line was finally going to happen. We even checked in august with Mr. Riggs who stated that the City was ready to go out to bid. We have spent approximately \$20,000 dollars in drainage, rock wall and foundation for a new residence because we fully expected this project to finally go ahead. This is very disappointing news to hear that it is not. Our problem is our septic tank is located in the middle of the property, to finish our construction project we would have to remove the tank and hook up to a sewer line. Now that the proposal has stalled, so has our construction project. We are at your mercy at this point! Please consider not only myself but other people who have been looking forward to improving their lots for the past 10 years. Thank You, Al Stevens, 2606 SMCR
